Profile

Self-taught developer with a proven ability to learn quickly and adapt in fast-paced, collaborative environments. Prioritizes writing clean, maintainable, and modular code, ensuring applications are optimized for performance and scalability. Possesses a strong problem-solving mindset, guiding teammates to tackle challenges effectively. Motivated to deepen expertise in building scalable, distributed systems with emerging front-end technologies and frameworks.

Projects

DevDen - Connect and Collaborate, Explore tech events and buy tickets

Developed using technologies **TypeScript, Node.js, Express.js, React.js, Redux and MongoDB**

- Auth using JWT, chat, organize tech events, buy tickets, profile, notification, video call, qr code, withdrawal, like comment & save, report, admin manage, ticket download and refund.
- socket.io, stripe, clouinary, google authentication, zego cloud
- Used Repository pattern at backend
- Followed proper git branching
- Live : <https://devden.ananthuks.online> [↗](#)
- Client Repo [↗](#)
- Server Repo [↗](#)

Otaku Hub, E-commerce store

Developed using technologies **Node, Express, Ejs and MongoDB**.

- Authentication and authorisation by JWT, MVC structure
- User side (auth with otp, list products, category, cart, coupons, order, invoice, chat bot, wallet, referral)
- Admin side(sales info chart, sales report, management of user, products, order, coupon, banner)
- Razorpay payment integration, nodemailer, exceljs, pdfkit, multer
- Live : <https://otaku-hub.ananthuks.online> [↗](#)
- Github [↗](#)

Olx Clone, mini olx clone using Firebase and React (login and signup, add post, view, add favorites)

Github [↗](#)

CRUD Post,

small crud app using microservice architecture and gRPC for communication between services.
Github [↗](#)

Basic-RabbitMq, This mini project demonstrates a simple backend using a microservices architecture with RabbitMQ and Express. It covers basic order, authentication, and product services, with each service communicating via message queues to handle a single API request.

Skills

Frontend Development

HTML, CSS, JavaScript, TypeScript, React, Redux, Tailwind CSS, Bootstrap

Architectures

MVC, Microservices, Repository Pattern, Clean, API Gateway

Cloud

AWS EC2, AWS S3

Real-Time & Communication Protocols

gRPC , rabbitMq, Web Sockets

Payment Gateway

Razorpay, Stripe

Backend Development

Node.js, Express.js, RESTful API

Database

MongoDB, PostgreSQL

Tools & Version Control

Git, Github, Firebase, Postman, Figma

Data Structures & Algorithms

Familiar With

Docker , Kubernetes, CI/CD Pipeline, jQuery, Ajax

Professional Experience

Junior Web Developer, Trusttech IT Solutions 04/2025 – Present

Education

IGNOU, BCA 06/2024 – Present

BROTOTYPE 2023 – 2024

SNGS HIGHER SECONDARY SCHOOL 2022 – 2023 | Thrissur,Kerala

Certificates

JavaScript (Basic) Certificate [↗](#)
